

EQUIPONA®

SMART FEEDING
TECHNOLOGY
FOR HEALTHY
HORSES

PRODUCT OVERVIEW

About us

Equipona develops advanced feeding technologies benefitting your horse's well-being. Our automatic feeding solutions combine precision, ease of use, and durability – so you can rest assured your horse is always fed at the right time.

For over fifteen years, innovation and quality have been the top priorities for Equipona and B&B Equipment GmbH. Thanks to carefully selected materials and impeccable workmanship, our feeding systems are among the absolute best in their segment.

Our products are sold worldwide to satisfied customers.

On the following pages, we present our three standard systems. We also offer customized solutions.

We always enjoy a challenge!

Are you planning to build or renovate a new equestrian facility or private stable? We are happy to support you in the planning, development, and implementation of a fully automated feeding system.

Do you have ideas and visions that go beyond standard solutions? We are also eager to assist you with technical support.

Our motto is to develop innovative products and implement them at the highest quality level.

Interested? We'd love to hear from you.

Why Equipona?

1. More Natural Feeding = Healthier Horses

The horse's natural feeding rhythm requires distribution throughout the day. Traditional feeding disrupts this balance and increases health risks.

Equipona ensures:

- Feeding moments spread over 24 hours
- Significantly lower risk of colic and gastric issues
- Calmer stable behaviour
- Improved digestion
- More consistent performance

Result: greater wellbeing and stability

2. More Control. Less Dependency.

No stress around fixed feeding times.

No stress when you are absent.

No errors caused by manual feeding.

With Equipona:

- Every horse is fed correctly
- Feeding is always consistent and controlled
- You no longer lose time on daily routines

Result: peace of mind and time savings

3. Professionalising Your Stable

An automatic feeding solution is no longer a luxury.

It is a sign of modern stable management.

Equipona offers:

- Industrial-grade quality
- Durable materials
- Reliable technology
- Support and service

Result: a professional image towards clients and owners

4. Sustainable and Economically Responsible

- Less feed waste
- Reduced labour
- Lower health costs
- ROI from day one

Result: an investment that pays for itself

Why Customers Choose Equipona

- ✓ Not the cheapest solution
- ✓ But the most well-considered
- ✓ Built for the long term
- ✓ Developed from real-world experience

PowerFeeder

PowerFeeder Standard

*Grains, chunks, muesli,...
34, 45, 60 litres
1 feed type
1 motor: distribute*

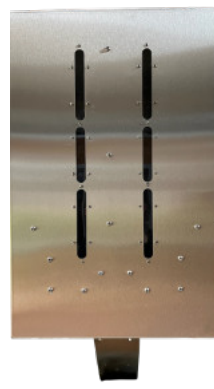

PowerFeeder Senior

*PreAlpin Senior, forage,...
34 or 45 litres
1 feed type
2 motors: mix & distribute*

PowerFeeder Structure

*Alfalfa blend, Green Balance,...
34 or 45 litres
1 feed type
2 motors: mix & distribute*

PowerFeeder 2

*Grains, chunks, muesli,...
2 x 18 litres
2 feed types
2 motors: distribute*

The **PowerFeeder** delivers concentrates and grains throughout the day in frequent, personalized doses.

This allows you to feed your horse outside of normal working hours.

All common types of concentrates – from pellets and muesli to oats and alfalfa, including fibrous feed – are processed effortlessly.

The result: **stress-free feeding** for optimal care and guaranteed well-being of your horses.

Our PowerFeeders are made of high-quality V2A stainless steel, which stands for exceptional quality and durability.

Feeding times and quantities can be adjusted individually or in groups based on your horses' needs.

We are ready to advise you and can, if desired, work with you to design the concentrate feeder that perfectly suits your stable.

Our patented feed unit inhibits feed loss due to shocks.

Feed loss is also prevented as the feed outlet closes after feed distribution.

Up to 35% feed savings!

Centralized management for a single distributor or multiple automatic systems.

The feeder(s) can operate on solar-power with batteries.

The advantages of our PowerFeeder systems at a glance.

Personalized doses

- Individually adjustable portions per day, programmable as desired according to the feeding and/or training schedule

Economical efficiency

- Up to 35 % feed savings
- No refilling for up to one week, depending on the selected dosages

Technology

- Patented and unique
- Always the right amount at the right time
- Central control for multiple automatic feeders
- Easy management of feed varieties
- Management of feed quantities per horse and per box
- Display of daily, weekly, and annual consumption for feed accounting
- Touchscreen for central control (PIN code protected)
- Easy to set absences (competition, training, pasture, etc.)
- Electronic level indicator
- Solar-powered operation with batteries is possible
 - > No annoying battery changes required
- No loss of program memory in the event of a power outage
- No draining of the feeder in the event of a power outage

Specifications

PowerFeeder (Standard, Senior, Structure)

Capacity*: 34, 45 or 60 litres

installation.

The **PowerRaufe** provides time-controlled access to hay – in both group housing and individual boxes. It can easily be filled for multiple days, eliminating the need for daily refills.

You decide when and how long your horses have access to the hay. With up to 40 programmable feeding intervals, the **PowerRaufe** prevents boredom and uncontrolled eating behavior.

The system can optionally be equipped with a hay moistening function, allowing the horses to eat freshly watered and **dust-free hay** during each feeding. This promotes **respiratory health** and is especially recommended for horses with equine **asthma** or **allergies**.

Specifications

PowerRaufe

As a semi-circular feeder against the wall of the box

PowerRaufe

For two single boxes in the middle of the dividing wall

PowerRaufe 2

Two semi-circular feeders are assembled into a round feeder for the pasture

Optional with hay humidifier

Ideal for horses with equine asthma or allergies

Video

For healthy respiratory health.

A guarantee against boredom, but also against eating too fast and too much.

Solar power with battery options available.

Individual timer control.

General information

PowerRaufe – flexible and cost-effective hay system:

The PowerRaufe has a filling capacity of two to three small hay bales. Thanks to more than 40 adjustable feeding intervals from 1 to 60 minutes, you can equip your loose stable or group housing facility cost-effectively and with a timer, without the need for a transponder system.

PowerRaufe

Semi-circular or corner feeder for mounting on the stable wall

Number of horses:

Semi-circular: 1-3

Corner model: 1-2

Dimensions (w x h x d): 110 x 140 x 70 cm

PowerRaufe – the round feeder

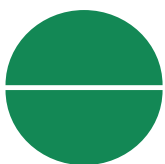

Two PowerRaufes can be combined into one automatic, freestanding round feeder. This allows up to six horses to be fed in group. This solution is exceptionally flexible compared to conventional feeding systems.

PowerRaufe

Freestanding round feeder

Number of horses: 1-6

Dimensions (w x h x d): 110 x 140 x 140 cm

Depending on the model, the feeder is filled from the top or via a tailgate.

The **PortionsRaufe** is an automatic hay rack, specially developed for freestanding use in paddocks and stables. The system is weatherproof, extremely stable, and even **resistant to hoofbeats**.

The feeder works with hinged layers. These drop silently at preset times, releasing hay in a controlled manner.

You can program up to four portions per cycle at times of your choosing, and set multiple cycles per 24 hours.

The system makes staggered feeding simple and reliable. We use only **V2A stainless steel** for the base frame, while the paneling and doors are made of waterproof, cross-laminated timber. This makes the **PortionsRaufe** completely **waterproof** and exceptionally durable.

Feeding example

Time	
8 am	Manual hay feeding + fill
10 am	1. Time-controlled hay feeding
12 am	2. Time-controlled hay feeding
2 pm	3. Time-controlled hay feeding
4 pm	4. Time-controlled hay feeding

The automatic hay rack can easily be filled a second time during the day – for example, after riding at 6:00 PM - with four additional portions. This allows you to provide your horse with up to ten rations of hay with just two visits per day. An ideal solution for keeping your horse well-groomed and occupied.

In addition, the feeding output area can optionally be equipped with a feed fence.

Easily fill with hay or other feed.

No disturbing noise when the layers drop.

Customization possible.
